

DECOTIIS, FITZPATRICK & COLE, LLP

PHARMACEUTICAL

LOCATED IN ONE OF THE WORLD'S LEADING REGIONS FOR PHARMACEUTICAL RESEARCH AND MANUFACTURING, DECOTIIS CAN PROVIDE A UNIQUE, POTENT DEGREE OF LEGAL EXPERTISE FOR PHARMACEUTICAL AND MEDICAL DEVICE COMPANIES. Our attorneys are some of the leading experts in the legal specialties pharmaceutical companies rely on. This includes leading regulatory and government affairs specialists, intellectual property and trade secret practitioners, transactional attorneys with significant experience in mergers, acquisitions, joint venture and distribution agreements, and some of the state's best environmental attorneys.

Unfortunately, pharmaceutical companies are also often embroiled in litigation, often as the target of a well-funded and coordinated plaintiffs' bar. Whether the allegations are for toxic torts, personal injury, defective product or more routine forms of business litigation, we have a track record of representing pharmaceutical clients zealously and cost-effectively, and when appropriate, settling cases quickly, and at the minimum cost to our clients in both distractions and dollars.

Whether it involves regulatory bodies, litigants or transactions, legal issues are a fact of life for pharmaceutical companies. The lawyers of DeCotiis are experienced, responsive partners in managing, and effectively handling, these issues.
